“THE EVOLUTION OF A MAN”

WRITTEN BY: POSITIVE B WHITE

Disclaimer: I am not an expert on this topic; these are simply my thoughts and my opinions on “The Evolution of a Man”.

At birth, the young infant male exits his mother’s womb and enters the world. The first thing he learns to do is breathe. This comes naturally; no one teaches him to do so. Afterwards, he opens his eyes. Everything at this point is a blur. From this point on he has to either learn or be taught. For example, he must learn how to walk, talk, read and write. Majority of the time his parents or legal guardians have the responsibility to teach him. So how does an infant male evolve from a child to an adult male? This process is called “Life”.

One of the most important things an infant/child needs is his parents. By this, I mean both his parents; He needs his mother and his father. Even though the parents may not have a good relationship there are things his mother can teach him that his father cant and vice versa. Don’t get me wrong, there are many instances where a male grows up in a single-parent home or group home and goes on to become a successful adult male. We have seen many cases of this. Sometimes a death in the family of one or both of the parents can cause a child to be raised in a single-parent home. This circumstance is out of our control.

The Solution: Shift your focus on what you can control! Keep reading.....

My God-given purpose in this world, which was learned, is to promote a positive environment between all races around the world as well as encourage each individual to pursue his or her passion. Your passion is what wakes you up in the morning. Sometimes it keeps you awake all night. Protect your passion with your life I believe it will keep you sane (laughing). Keep in mind; everyone has a different passion whether it’s making music, playing sports, directing films or making people laugh **YOU CAN DO IT!!!!** I assure you it won’t be easy but I’m here to keep you motivated and push you.

In Conclusion, I want to share with you the four keys to success in “Life”.

- 1. Keep God first in all you do**
- 2. Keep a POSITIVE attitude**
- 3. Find out your passion and pursue it**
- 4. Stay motivated- keep a team full of go-getters and mentors around you at all times**

I hope this letter helps!

My Best Wishes,

Positive B White
